(54) Title: LARGE-SIZED, MOUNTABLE AND REMOVABLE SHEET ASSEMBLY AND METHOD THEREFOR

WO 01/79372 A3

(57) Abstract: A large-sized sheet assembly for receiving graphics and/or text from a printer includes a paper facestock, an adhesive film and a release liner. The adhesive film extends over an entire side of the facestock. The release liner covers the adhesive film and may be scored or otherwise provided with lines of weakness such that the release liner may be removed in individual sections. A method of printing and using the large-sized assembly includes printing the assembly with a wide-format printer, such as a wide-format inkjet printer, removing a section of the scored release liner and adhering a section of the sheet assembly to a substrate. Additional sections of the release liner are removed and corresponding portions of the sheet assembly are sequentially adhered to the substrate. The substrate may be a wall, a glass window, or any of a variety of different surfaces.

## \* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*&\* document member of the same patent family
